PROFESSIONAL SUMMARY

Computer Science graduate with an M.Tech in AI & Machine Learning, seeking entry-level roles in software development, AI/ML, data analytics, or system engineering. Gained industry experience at Sanrei Foods Corporation, Japan, building Azure-based OCR systems and AI-powered applications using TypeScript and Azure OpenAI. Hands-on with Python, computer vision, deep learning, and full-stack development across multiple end-to-end projects. JLPT N5 certified with 6 months of real Japanese workplace experience. Adaptable, fast-learning, and comfortable working across tech stacks.

EDUCATION

M.Tech — Artificial Intelligence & Machine Learning (2024 – 2026)

Rajagiri School of Engineering & Technology, Kerala Technological University

CGPA: 85.80%

B.Tech — Computer Science Engineering (2020 – 2024)

Adi Shankara Institute of Engineering & Technology, Kerala Technological University

CGPA: 84.40%

WORK EXPERIENCE

AI Development Intern at Sanrei Foods Corporation, Tottori, Japan (Nov 2025 – Mar 2026)

- Developed and refined prompt engineering logic and TypeScript frontend for an AI-powered recipe generator with a chat-based interface.
- Contributed to an OCR web application built on Azure Document Intelligence, handling document processing, JSON data extraction, and structured data reconciliation.
- Gained hands-on exposure to Japanese corporate culture, morning assembly routines, and cross-cultural team collaboration.
- Technologies: TypeScript, Azure Document Intelligence, Azure OpenAI, GitHub, VS Code.

Frontend Development Intern | Federal Academy For Cyber Education (FACE) (May 2023)

- Completed a 30-day internship focused on web development using PHP, building 2+ user-friendly web interface modules.
- Practical experience in frontend development workflows and responsive UI design.

TECHNICAL SKILLS

Languages	: Python, TypeScript, SQL, C, HTML, CSS
AI / ML	: Machine Learning, Deep Learning, Computer Vision, Pytorch, Tensorflow, Prompt Engineering
Cloud and Tools	: Azure Document Intelligence, Azure OpenAI, Flask, Flutter, Git, GitHub, VS Code, Google Colab
Data & Analytics	: Data Analytics, Pandas, R, Tableau, Excel, SQL
Languages	: English, Hindi, Malayalam, Japanese (JLPT N5-Conversational level)

PROJECTS

- **AI Pipeline for Stray Dog Rescue Management** | Python, Flutter, YOLOv8, Xception CNN, Flask, Google Gemini API, SQLite
Built an end-to-end mobile system for stray dog rescue operations integrating dual AI models : Xception CNN (86.55% accuracy, 98.73% top-3) for breed classification and YOLOv8m for injury detection. Implemented GPS-based shelter routing using the Haversine formula, a Flutter app with 3 user roles, and a Gemini 2.5 Flash chatbot with live function calling. Created and publicly released the first annotated stray dog injury dataset (738 images).
- **Cataract Detection using Deep Learning** | Python, VGG19, ResNet50, MLP, TensorFlow
Comparative deep learning pipeline for cataract classification using fundus and anterior eye images. Implemented VGG16 and ResNet50 feature extractors combined with an MLP classifier, achieving up to 95.60% test accuracy. Evaluated across ROC-AUC, precision, and recall metrics.
- **Smart Street Lighting System** | YOLOv8, IoT, Cloud Analytics
Designed a real-time object detection using YOLOv8 to automate street lighting based on pedestrian and vehicle presence. Integrated sensor data with cloud analytics for intelligent energy management and remote monitoring.
- **Student Performance Prediction System** | Python, Scikit-learn, Machine Learning
Built an ML model to predict student academic outcomes using academic and behavioral features. Applied data preprocessing and feature selection to improve prediction accuracy.

CERTIFICATIONS & LICENSES

- **San'in Kerala Long Term Internship Program Certificate** : Mar 2026
- **JLPT N5 — Japanese Language Proficiency Test** : Aug 2025
- **Japanese Language Course for Beginners (340 hours)** : Mar 2026
- **Data Science for Engineers** : Sept 2025
- **Google Data Analytics Professional Certificate** : Coursera (by Google)
- **Python for Data Science** : NPTEL , Aug 2023
- **Design Thinking: A Primer** : NPTEL — IIT Madras | Feb 2023
- **Web Development Internship (PHP)** — Federal Academy For Cyber Education (FACE), May 2023

ADDITIONAL INFORMATION

Student Exchange : Shimane University, Matsue, Japan

Workshops : Flutter, Python, .NET

Hobbies : Badminton, Cycling, Drawing.
